**Happy Easter !!**

**By Laura**

## **Traditional Easter in France**

In France is not the rabbit of Easter but the bells. We say to the children the bells came back to Roma and put in the garden some chocolates and candy.

It is because the bells stop to ring from Thursday until Sunday of the Saint Week. It is connected the end of Chareme.

Before or after the family lunch it is time for children to find all the chocolate eggs the bells put in the garden.

It is a very funny moments for children to find eggs:)

## Few traditional food for Easter.

Usually, we eat lamb with beans but sometimes it could be green beans with potatoes and mushrooms.

In some region in France some families eat « le pâté de Pâques » it's a kind of bread with i eggs meat inside.

Of course for the dessert we have something with chocolate.

## The good activities to do during Spring !

It is the time to have a nice day outside and enjoy the sun. To go to the forest or everywhere and do some sports .

It's time to visit some nice sunny place for example **the garden of Versailles**. Because is the perfect moments to see beautiful flowers.

Every Sunday start the flea market.

It is time to take care about your garden.

## Few things about the chocolate competition in France.

This is Christophe Michalak. He won with the French team the world cup of the pastry in 2005.

The competition start on 13<sup>th</sup> to 16<sup>th</sup> February. The first competition was in 1990 and it's every three years. For now we know 19 masters of chocolate, they won the price of "meilleur ouvrier de France."

It's very prestigious price for them. They need to respect the rules, the theme imposed, should be creative and artistic and to have good recipe.
